Hi, Scott,

Thanks for your comments. I will make them part of the file and will give them consideration in my decision. I will also keep you updated.

Have a good day,
D

Hi Devetta,

I finished my review and concur with your decision to grant coverage for this project under NWP 21. My only comment/concern is, it is still necessary for the applicant to conduct biological, chemical and physical sampling in the spring (when there is water in the channels and aquatic life are reproducing/feeding, etc) to adequately assess the functions and values of the streams to be impacted. I would suggest that sampling in the spring and using those results to update the stream assessments/mitigation/monitoring and performance standards, be a condition of the coverage. Thank you for allowing me time to review and your consideration of my comments. Please copy me on any changes or updates to this project and on the authorization to commence work.

Scott

Hi Devetta,

I am reviewing this PCN and intend to submit comments.

Thanks,
